

6516208642.txt

My purchase of satellite radio was mainly due to interference from radio stations in Mexico..I couldn't hear some of the channels anylonger and could barely here others..I had been listening to some of these stations for years...Another reason..those overly loud and obnoxious advertisements (especially the car dealerships)...I enjoy all the different, clear, and uninterrupted music and news that I am getting now and will fight like hell to keep it.
